How can I make Dr. King's Dream come true?

Our community could be a little bit more caring to African Americans. One of the reasons we don't have a lot of African American is because they probably don't feel comfortable here. Everybody should feel comfortable wherever they live, not just white people. To help fix this problem our community could encourage African Americans to come and live here. People could tell them in a nice welcoming voice to make them feel even more comfortable.

I personally can make Dr. King's dream come true by becoming friends with an African American. I can be nice and kind to make them feel welcome. I can play one of their traditional games to make them feel important. I can also be a good friend. Being a good friend to others is helping the problem a lot.

If our community all comes together we can make a big change in how African American people feel. We can make them feel happy instead of sad. We can make them feel welcome instead of unwelcome. But most importantly we can make them feel just as important as we white people feel. That is the most important thing that we struggle with.

Everybody is equally important in God's eyes. That is how we should treat everyone, not just white people. Everyone is equal in being loved in God's eyes. Those are two great reasons why we should treat all people the same.

African Americans are equally important in everything white people are. This is a major problem that we need to fix. We all can help this problem by caring more about how African American people feel. We can all make a difference, so let's make a difference in how we make African American people feel. Not just how white people feel.
